Library Consortia a Co-Operative Platform for Libraries

Anil Anandao Jewalikar*

ABSTRACT

Consortia is such grate platform for libreias. It has gained momentum ever in developing countries.

Present paper focused on various aspects of consortia and some Indian consortia and needs of consortia. In this paper briefly discus about advantages and disadvantages of consortia.

Keyword: library consortia, CSIR, INDEST, INFLIBNET

The exact date of the introduction of the term library Consortia is not clear but the concept of consortia as begin Association or partnership has long begin a principle of librarianship.

The explosion Information and inadequate library urged the libraries to adopt new Philosophers and technologies for collection development and reduce the costs Information. Library consortium is an Association of a group up library to achieve mutually the common objective. It is I felt that the concept of E-journals consortia Can work well The libraries without requiring additional fees to access the E Journal.

DEFINITION CONSORTIA

A consortium could be described as a group of organization who come together to fulfill a combined objectively that usefully requires cooperation and the sharing of resources. And need to have a clear mutual goal in order to insure the their success. The aim should be to deliver "More than the sum of the individual parts". A library consortium Formation can be local, Regional, state, national and international.

NEED FOR LIBRARY CONSORTIUM

The consortium Is needed for libraries because of

1. Information explosion
2. Diversity of users needs
3. Financial crunch
4. Impossibility of self sub institutional

Library consortium

The word consortium has been originated from the Latin in early 19th century in the sense partnership. Oxford advanced learner's dictionary's defects consortium as a group Of people, Countries, Companions, etc who are Working together on a particular project. A library consortium is a network of libraries/Information centers that agree for resource sharing in order to satisfy The

information needs of users on the basis of library cooperation. Potter (1997) Identified the following reasons Formation of consortia. Better sharing Existing resources and jointly Acquiring new resources at great saving providing enhanced library services with an emphasis on access to new electronic resources including database and service offered through the internet and the? Expediting Library borrowing, which has evolved into providing as many electronic resources as possible at the lowest cost to Consortia member.

Aims and objective

The main objective of the UGC-INFONETdigital library consortium is to provide access to qualitative E-resource including full text and bibliographic database to Institution at a lower rates of subscriptions. The major aims and objectives of This consortium are as follows

- I. To provide access to a high quality and scullery electronic resources to a large number of Academy institutions including universities and colleges at Lower rates of subscription and at most favorable terms and conditions
- II. To promote rapid and efficient access To scholarly Content to the users and to create and promote users of ICT in teaching and learning in universities in India
- III. To extend the benefits of consortium to its associate members including private universities and colleges
- IV. To evaluate The uses of the Resources and to identify new resources that are required to be subscribed under the programme.
- V. To increase the research productivity of the institution both in terms of quality and quantity of Publication.

Benefits

There are many many Benefits of this consortium in the modern information age. it acts as a single window service for the big number of academic institutes, With their Research and academic interest in India. This concert Siam make I will able resources to the participating Institute and highly discounted rate of subscription with the most favourable term and condition of agreements. The rate offered to the concert Siam are the lower by 60 percentage to 90 percentage depend upon the category of Institute.

Features of the library consortia

- I. The collection of conservation library is enabled each member of library to support scholarly research for it users.
- II. It provides each organization and Institute with the capacity to share their resources without suffering in the individually off each member of library.
- III. Cooperative research Development in application of information communication and technology enhances Service and Realise cost effectiveness.

Presents system of conservation in India

Several working models of library consortia as are prevailing in a difference nation and among different group of Institute. In India some library consortia for example UGCINFONET, The INDEST, CSIR, ISRO, DRDO. All India council of technical education and some other individual groups of Institute have started working to difference consortia.

The UGC-INFONET digital library consortium

Is major initiative of UGC to bring qualitative change in academic world in India. It was formally launched in December 2003 by honorable Dr. A. P. J. Abdul Kalam, the then president of India, Soon after providing the Internet connectivity to the universities in the year 2003 under the ugcinfonetprogram this consortium is an ambitious Program for providing access to Scholarly Electronic resources Including full text and bibliographical Database in all subjects disciplines to academics and research community in India in order to bring qualitative change in teaching, learning and research in Indian Higher education. journals and 09 bibliographical database in various subjects from publisher and Aggregators. Presently membership of this consortium is and thus Terms of users, this has become the largest consortium in India.

CSIR library consortia(Council for scientific and industrial research E journals Consortia NISCAIR) is the central organization for developing a consortium for csir laboratories for accessing I journals. The activity shall range from Creation to Monitoring of the access facility of scientific periodicals published by Leading international institutional journals. Under, csir scientists shall be able to access these journals and download material for their respected subject. Search access to worldwide Journal resources will play a very vital role and strengthen research and development in, csir laboratories, Leading to knowledge generation useful for socio economic development of the country.

ROLL OF INFLIBNET

The established task of the INFLIBNET(Information and library network) Of the ugc is to interconnect all educational and research institution's in the India for pulling and sharing of library and information resources and thereby ensure Easy availability and speed access of information resources for all academic and Research programs in the country UGC 1998 the service of the INFLIBNET covers all types of educational and Research institutes and government organisations and hence it was primary responsibility to plan and established single consortium for the whole country this should not be limited to server only the conventional University and college but include Agricultural Veterinary Medical and engineering university all types of college governments research institution engaged in the field of Defence space industry agriculture medicine atomic energy etc. refund required for establishing and maintaining the proposed Indian library consortium should be set apart the higher Centre Li in The Union budget or by individual controlling Institutions such as UGC, ICAR, AICT, DRDO, ISR o IMC etc order establish grated information system in India.

IINDEST

The ministry of human resources development as setup Indian national digital library in engineering science and technology known as indest. The benefit of this consortia patient subscription to Electronic resources is not confirm to 38 major technological Institute in the country but it also extended to all AICTE Accredited and ugcaffiliated Institute joined to the con sotium.

CONCLUSION

Library consortia providing for physical and electronic delivery of materials and integrating the collection development process are all district and crucial step in moving towards the 21st century library it is case clear early identify dynamics represent in important goals and milestones for measuring our common progress on a journal through a new and l'm family landscape concert yaar tools which will add in exploring the features of the research that as well as in effective saving.
